

Floor Maintenance & Cleaning Specification

PUR Vinyl Sheeting & Tiles

General Guidelines:

PUR vinyl sheeting and tiles feature a cross-linked high quality polyurethane reinforcement. The floor should not be sealed.

NOTES: We highly recommend an effective barrier/entrance matting system to reduce the dirt tracked into the building. Never use a Black Pad on a PUR floor.

Post Installation & Periodic Cleaning

Step 1:

- All dust, sand and stones must be removed prior to scrubbing. This can be done with either a vacuum cleaner or by sweeping with disposable cloths such **Masslinn®**.
- Scrub the floor using a solution of a neutral detergent such as **Proclean** diluted according to manufacturer's instructions, with a **Low Speed Scrubber** fitted with a **3M Blue Cleaner Pad**. For detail work, use an edge cleaning tool with blue pad.

Step 2:

- Vacuum the dirty **Proclean** solution from the floor with a **Wet & Dry Vacuum Cleaner**. The floor should be thoroughly rinsed with clean water to remove any remaining chemical residue.
- If no machine is available, remove the solution from the floor using a mop and mopping system. The water and mop must be changed frequently so as to remove as much chemical residue as possible from the floor.

Cleaning of Equipment:

1. All equipment should be cleaned thoroughly after use.
2. Pads should be rinsed or vacuumed depending on soiling.
